ERJO RECHIPPER TYPE 550 S

For reduce oversize chips coming from chip screens in sawmills, paper- and boardmills.

The rechipper is selfexcited and therefore extremely reliable in running.

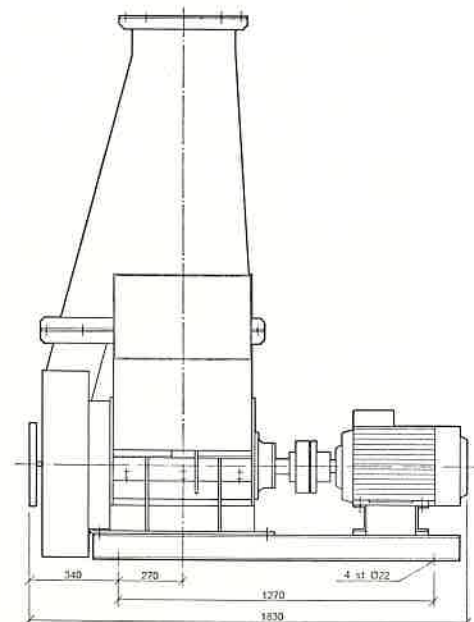

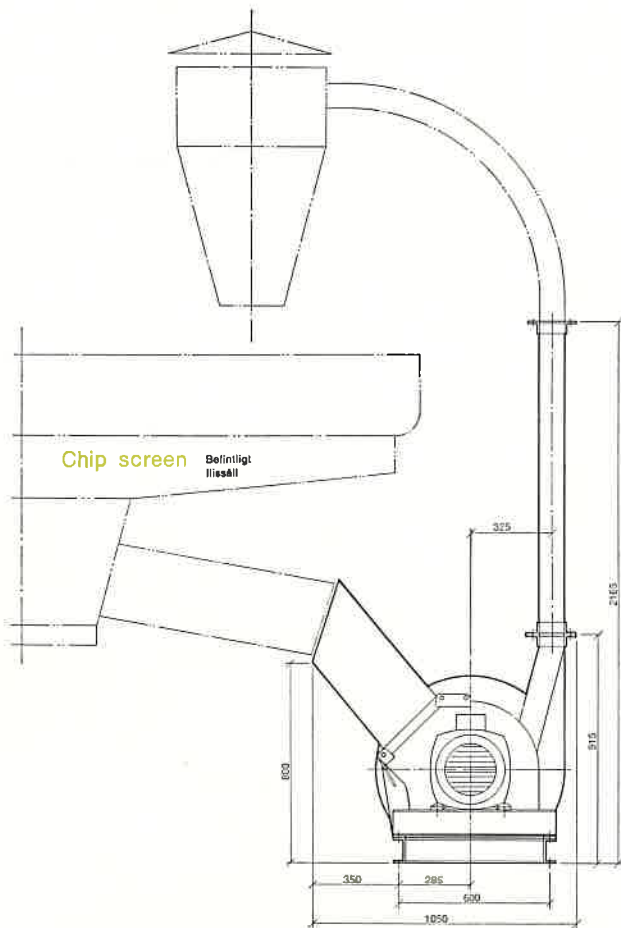

Large feed opening which prevents the material from sticking in the infeed chute and from causing break downs.

The rechipper shall be instalated in direct ad-

hesion to chip screens, and have built-in ejector fan with adjustable air volume and throws the chips automatically onto the chip screen.

The rotating chipper knives are adjustable for different chip lengths. The adjustment is easily done with adjusting screws.

The adjacent iron is reversible and all four edges can be utilized.

TECHNICAL SPECIFICATIONS

Infeed chute	500 × 275 mm
Discharge chute	410 × 100 mm
Diameter of cutter	Ø 450 mm
Diameter of axle	Ø 60 mm
No. of chipper knives	4
Dim. of chipper knives	550 × 75 × 10 mm
Speed	1400 r.p.m.
Capacity	10–30 m ³ chips/h
Power required	25–50 HP
Effective returning high	5 m
Weight without motor	about 750 Kg
